FOREWORD

America's communities face the choice of orderly or disorderly growth. Population pressures and the demands of an expanding economy already are taxing the resources of our communities to provide the amenities commensurate with the American standard of living. These pressures will increase in the years ahead.

Involved in communities providing the facilities that our people require are such complexities as the boundaries of local government, political authority, tax structures, industry participation, zoning regulations, staggering financial outlays and a multitude of other factors.

It is important that all segments of the home building industry, government and the general public, all of whom have a stake in this future growth, get fully informed about this growing problem of community facilities. To contribute to this understanding this bibliography was compiled by the National Housing Center Library under the auspices of the National Association of Home Builders.

PREFACE

Solution to the problem of furnishing community facilities for an expanding population and even more rapidly expanding city areas must be found to insure the continued health of our urban civilization. The Community Facilities Committee of the National Association of Home Builders feels that a bibliography of Community Facilities publications and articles will serve all citizens and officials concerned with a better America, and thereby facilitate the work of the Committee and builders dedicated to better housing.

This bibliography treats the broad subject of urban growth and the specific subjects of the concerned facilities (schools, water distribution, etc.). Planning and zoning are covered as tools which may be used toward a solution of the complex problem involved. It is hoped that the last section in the bibliography, annotated citations of pertinent legal cases, will be of particular interest. In most instances, the selection of references was limited to those dated 1951 and later.

Supplements are intended to keep this publication current and it is hoped that important additional titles will be furnished whenever omissions are discovered. Information as to important documents such as doctoral theses, whether published or not, are earnestly solicited in order that supplements might provide maximum service to students and practitioners in the field of urban development. As experience is gained in urban renewal

a section will be added on the renewal, and change of facilities in the central city as well as the interrelation of central facilities with those in the remainder of metropolitan areas. A comprehensive bibliography is being prepared in the field of real estate research projects under the auspices of the Urban Land Institute so a section on "Research" has been eliminated. An extensive bibliography on metropolitan communities has been prepared by the Government Affairs Foundation, Inc. This work, scheduled for publication in the near future, will be of considerable interest to those working with the community facilities problem.

We wish to express our appreciation to a number of individuals and organizations for many courtesies received during the preparation of this work. Mr. Max Wehrly and the staff of the Urban Land Institute made available the research files of that office. Mr. Jack Merelman of the National Institute of Municipal Law Officers was most kind in arranging the loan of much useful material. Mr. V. E. Hartman of the Washington Federation of Churches was especially helpful in the preparation of the section on church facilities. The librarians at the Housing and Home Finance Agency deserve a special word of thanks. And without the services and collection of the Library of Congress this bibliography could not have been completed.

Supp.(2d)501 (N. Y. Sup. Ct., Monroe Cty.,
July 6, 1954).
City adopted ordinances authorizing installa-
tion of sewer and water utilities, installation
of sidewalks, street paving. Court held that
such action by city constituted legal accept-
ance of offer of dedication of entire street.

B. CASE CITATIONS (Cont.)

1039. New York. Rabasco v. Town of Greenburgh 137 N. Y. Supp.(2d)802 (Appellate Division, Feb. 14, 1955).
Changes in zoning requirements made without notice of public hearing and lack of 3/4 vote of Town Board held invalid. Changes would have permitted construction of a public housing project.
1040. New York. Titus St. Paul Property Owners Assn. v. Board of Zoning Appeals of Town of Irondequoit 132 N. Y. Supp.(2d)148 (N. Y. Sup. Ct., Monroe Cty., July 7, 1954).
Religious corporation granted permit to use realty for house of worship and religious education, provided that off-street parking be provided. Court held that Board had no right to make such a restriction, but that the provision would be removed only upon complaint of property users (religious corporation), not of others in neighborhood.
1041. New York. Union Free School District no.14 of Town of Hempstead v. Village of Hewlett Bay Park 107 N. Y. Supp.(2d)858 (Appellate Division, Oct. 29, 1951).
